                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       J. Membr. Biol. 171:55-62(1999).

-!- FUNCTION: High-affinity, low capacity permease involved in the transport of the cationic amino acids (arginine, lysine and ornithine) in non-hepatic tissues. May also function as an ecotropic retroviral leukemia receptor.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Bukaryota, Metazoa, Chordata, Craniata, Vertebrata, Buteleostomi,

Cloning and expression of a cAMP-activated Na+/H+ exchanger:

T "Cloning and expression of a cAMP-activated Na+/H+ exchanger:

T evidence that the cytoplasmic domain mediates hormonal regulation.";

Proc. Natl. Acad. Sci. U.S.A. 89:6765-6769(1992).

- I- PUNCTION: Involved in pH regulation to eliminate acids generated by active metabolism or to counter adverse environmental conditions. Major proton extruding system driven by the inward sodium ion chemical gradient.

- SUBCELLULAR LOCATION: Basolateral membrane.

- I- FUNCTION: Activated by cAMP, protein kinase C.

- I- MISCELLANEOUS: Inhibited by amiloride and 5-amino-substituted derivative and activated in a cooperative fashion by
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Transport; Antiport; Sodium transport;

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

F3H9.12 protein - Arabidopsis thaliana (mouse-ear cress)

C;Species arabidopsis thaliana (mouse-ear cress)

C;Species arabidopsis thaliana (mouse-ear cress)

C;Date: 02-Mar-2001

S;Recession: C86408

C;Accession: C86408

K;Theologis, A.; Ecker, J.R.; Palm, C.J.; Federspiel, N.A.; Kaul, S.; White, O.; Alonso, Chin, C.W.; Chung, M.K.; Conn, L.; Conway, A.B.; Conway, A.R.; Creasy, T.H.; Dewar, K.; ansen, N.F.; Hughes, B.; Hulzar, D.

Anture 408, 816-820, 2000

hypothetical protein AT4g08700 [imported] - Arabidopsis thaliana hypothetical protein AT4g08700 [imported] - Arabidopsis thaliana (mouse-ear cress)

C;Species: Arabidopsis thaliana (mouse-ear cress)

C;Date: 16-Feb-2001 #sequence_revision 16-Feb-2001 #text_change 16-Feb-2001

C;Accession: C85087

A;Attle: Sequence and analysis of chromosome 4 of the plant Arabidopsis thaliana.

A;Reference number: A85001; MUID:20083488; PMID:10617198

A;Accession: C85087

A;Accession: C85087

A;Molecule type: DNA

A;Residues: 1-432 <STO>
